

# 14-19 SOLUTIONS

by WebBased

Works across schools, colleges and training providers. **Ideal for Diplomas!**

The complete, integrated solution for 14-19

# Area Prospectus

Save time with the WebBased Area Prospectus that is easy to keep up to date

## For Learners

**Easily find what you are looking for** - enter a search word and your postcode to find courses in the area and beyond.

**Find out how far you need to travel** - see courses on maps and find out how long the bus will take.

**Get help and advice** - save courses you are interested in to your e-ILP to chat through with a tutor or personal advisor.

**Find out more about courses** - ask providers questions online and follow quick links to provider websites.

## For Providers

**Save hours of time** - export courses from your existing systems into the Area Prospectus in one go.

**Market your courses** - link to full course information on your own website.

**How learners find your courses** - analyse the search terms learners use.

## For LAs

**Get the data you need** - reports for all your providers.

**Reduce your workload** - remind providers automatically when deadlines are due.

**A single place for all course opportunities** - supports apprenticeships, diplomas and HEIs.

**Encourage partnerships** - group providers together for diploma delivery and include courses from other LAs.

**Provide a single platform** - integrates with e-ILP and CAP.

# Common Application Process

Engage learners in a new way to apply for course places

## For Learners

**Save time with your application** - the CAP uses information already in your e-ILP.

**Celebrate yourself** - include text, pictures and videos from your ePortfolio.

**Only do it once** - apply for multiple courses across different providers in one go.

**Be up to date** - status updates tell you how your application is progressing by email or text.

## For Providers

**Reduce your workload** - process applications through the CAP or use your own in-house systems with automatic links to the CAP.

**Get the information you need from learners** - ask different questions for different courses.

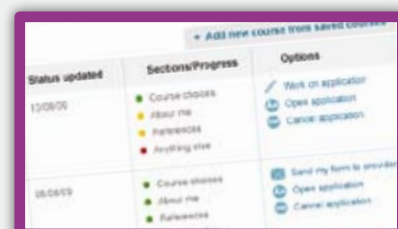

**Provide information to the LA automatically** - define which reports the LA can access at any time.

## For Schools, LAs and Connexions

**Everything in one place** - stop searching for the latest information.

**Easily track learner applications** - spot potential NEETs and meet the September Guarantee.

**Provide a single platform** - integrates with e-ILP and Area Prospectus.

Fully meets the current DCSF requirements

# e-Individual Learning Planner

A safe, secure environment with young people at the centre

## For Learners

**Make it yours** - change the e-ILP to suit your mood or personality and decide which tutors can access your information.

**Works everywhere** - ideal if you learn in more than one place.

**Help yourself improve** - set targets and get reminders by text or email when they are due.

**Celebrate success** - record your achievements, upload certificates and create your own e-Portfolio.

**More than words** - include pictures and videos in your e-ILP.

**Assignment tracking** - access resources online. Reminders prompt you when to hand in work.

## For Schools, Colleges and Providers

**A single system that works across sites** - perfect for multi establishment learning.

**Save time** - everything is together in one place saving time when writing reports or preparing for review days and parent meetings.

**Work easily with colleagues** - everyone can see the same information: share mark books, MIS data and learner comments across sites.

**Track learner attendance across sites** - online registers that are always up to date.

**Up and running in minutes** - extracts data from your MIS automatically.

**Resources and tasks** - easy to use tools for sharing resources and tasks across establishment boundaries.

## For LAs and Connexions

**Provide a common platform** - makes communication easy between schools, colleges and providers.

**Engage with personal advisors** - non school staff can have secure access to selected learners to provide help and support.

**Full integration with Area Prospectus and CAP** - common data, common training and common roll out.

**Integrates with your existing systems** - export information from the e-ILP to CCIS.

**Bespoke to suit LA needs** - Fully customisable to meet your requirements, from modules to design.

Pick and mix from the Area Prospectus, CAP and e-ILP or go for them all to provide a single common platform that meets all the current DCSF 14-19 requirements!

## Don't just take our word for it...

“ We are convinced that online attendance reporting has enabled us to shortcut the communication delay between the schools and off-site providers.

In September 2007 we introduced WebBased's e-ILP online attendance registering for 949 off-site learners. The success exceeded our expectations. It did take some time to convince everyone that it would work, but school staff soon valued being able to view individual and group attendance on screen at any time. The LA had a full overview of all registers and could check that these had been completed on schedule. It proved possible to spot patterns of absence developing, and target support before it was too late. ”

- Bob Mountjoy, TVC Director

“ Working closely with WebBased has allowed us to find local solutions focusing on our particular requirements. Thanks to their outstanding level of responsiveness and advice our Area Prospectus has become an exceptional IAG tool.

We are currently developing a CAP across Devon, Torbay and Plymouth which will fully integrate with our area prospectus and we look forward to these developments, alongside WebBased's e-ILP, which provides us with a comprehensive solution for both our 14-19 Partnerships and Local Authority needs. ”

- Chris Maccullie, 14-19 Area Partnership Manager (South and West Devon)

“ The WebBased e-ILP is an entirely unique system, allowing students and staff anytime, anywhere access.

It has been through the very close relationship forged with WebBased that we've been able to create such a groundbreaking product. ”

- Adrian Ballisat, Plymouth LA
